EXPORTING DIRECT TO CONSUMERS

How does it work?

WINE PURCHASING

Purchase your favourite NZ wines while you taste, directly from the producer via their e-Cellar Door shipping shop.

OUR EXPORT WAREHOUSE

When your order arrives into our warehouse it is checked and hand packed into specialised Thermo-Eco export packaging. It then joins a larger consolidated consignment prior to export.

INTERNATIONAL TRANSIT

Your wine is exported out of NZ and imported to your country.

CUSTOMS CLEARANCE

We manage the entire customs clearance process for you, including payment of your import taxes & duties.

YOUR HOME

Your wine is safely delivered to your nominated address by local courier.

PRODUCERS OF NEW ZEALAND

From Discovery to Delivery...

Easy export - direct to door

Unearthing new wine gems while Cellar Door tasting or online and sending them home is simple, fun, and affordable. Wine Collective Direct is a producer-direct purchase and shipping solution.

Producers set their own wine prices, then the system auto-adds the costs of shipping, and presents an all-up price in your home currency. This means bottle pricing is fully inclusive of all shipping costs from the winery, right to your doorstep.

Purchase via Producer's digital device, or your own. With no middle-man, producers directly receive the proceeds of their sale.

Buy directly from an individual producer's e-Cellar Door to access any volume discounts, or fill your case from your favourite wineries e-Cellar Doors, choosing across any number of regions.

Shipping powered by NZ wine HOME

Precious wine deserves precious care, and that's what we deliver. Since 2006 we have proudly partnered directly with NZ Producers to arrange the compliance and logistics of your wine export, directly to your door.

All inclusive pricing

Export charges, customs clearances, destination taxes and duties, insurance, and delivery to your door are all included in your fully inclusive wine price.

NZ made thermo-eco wine packaging

Our bespoke Thermo-Eco wine packaging provides robust and durable external strength. Internally, every bottle is hand placed inside its own thermally resistant protective sleeve made from recycled, 100% New Zealand sheep wool. Being biodegradable and reusable, our packaging is environmentally sustainable.

Prior to export, wine is consolidated over 1 - 2 weeks into larger volumes. Actual delivery time frames are dependent upon timely receipt of wine from the winery, to our warehouse.

Please visit our website for more precise delivery time frames.
